Days of Maya

A Review by Harley Porty

If you are a **fan** of ancient history and culture, this is a must-watch program. If you do not know what Maya culture is, you should not miss it. This documentary on Maya culture is interesting, exciting and informative. I have learnt a lot after watching the program.

In the program, a team of scientists who are studying history go to Mexico to discover the secret of Maya. They show us this adventurous journey, including digging things out from the old buildings, climbing rocks, visiting the caves and exploring the forest. The part I like best is the visit to the old palace. It shows us how people lived in the past with a short movie, which makes us easier to understand.

The views of southern Mexico are spectacular. It must be unforgettable if I can go there. I hope I will be there in the future. Besides, the visual effects of the documentary are very new. They help us a lot to think and imagine how the destroyed rectangular pyramid looked like, which you will never forget after the program.

I will recommend this adventure documentary to my friends.
